Peter Paukstelis joins K-State legal team

Peter Paukstelis, a Manhattan native and the CEO of a telecommunications company, has been named the new general counsel for Kansas State University.

The appointment of Paukstelis is part of a series of changes in leadership and service to the university and its students.

In addition to his school duties, Paukstelis is a frequent speaker at conferences around the country and recently spoke at a gathering in New York City on May 15.

Paukstelis was named to the position on May 15 by President Dana M. Britton, who earlier announced the addition of a new school for the humanities.

Before returning to Manhattan, Paukstelis worked at two law firms in Kansas City and Los Angeles. His law degree is from K-State.

According to Britton, “The addition of Peter Paukstelis to our faculty is another important step we are taking to ensure the highest level of service to our students. His leadership experience and legal expertise will be a great asset to our university.”

Paukstelis’s new position is in addition to his faculty positions. He will also continue to be chair of the board of directors of the Joplin Foundation.

The Kansas State Alumni Association and the Kansas State University Foundation have more than doubled K-State's Army ROTC program in the past three years, according to Pat Bosco, vice president for institutional advancement and director of intercollegiate athletics.

"What's key to our success is what the University and our donors have contributed in support of K-State's Army ROTC program," Bosco said. "These efforts have resulted in a stronger program that is more capable of preparing our students for active duty in the Army."

Bosco has had a positive impact on K-State, Wefald said. "This move consolidates all of the student life programs into one unit which, among other things, will facilitate planning for the transition of career and employment services and counseling services to Memorial Stadium," Wefald said.

"K-State is maximizing efficiency in institutional advancement. The jump is only partly due to increased availability. Nationally, this increase also is due to the availability of federal funds," Wefald said. "This change in title consolidates all the student life programs into one office."
