

does not quite meet the minimum number of majors, but the program is converting to an online format, so the recommendation is to continue on additional review. Finally, the BS in Health Studies program now exceeds both minima, so the recommendation is to continue that program.

Fort Hays State University
Status of Programs Identified AY 2016-2019 as Needing Additional Review

Program	Year of Review	CIP	Degree Level	Recommendation
Technology and Leadership	2017	52.0210	A	Additional Review
Technology Leadership	2017	14.3501	B	Additional Review
Communication	2019	09.0101	M	Additional Review
Health Studies	2019	51.9999	B	Continue
History	2019	54.0101	B	Additional Review

Kansas State University

The program review process at K-State began with each program examining its assessment of student learning. The Office of Assessment reviewed all reports with the Graduate School Assessment and Review committee additionally reviewing graduate programs’ reports on the assessment of student learning. Reviewers provided feedback and recommendations for improvement. Each program examined the statistical data and drafted a summary report resulting from their program’s self-review including the six criteria listed on page one of this report. In consultation with the College Dean’s Office and/or the respective College or Program Committee on Planning, each department finalized the Program Review Report for its academic programs (by CIP code) as required by KBOR. The college dean then forwarded the reports to the Office of Assessment for review and comment. When necessary, the Office of Assessment returned the reports with suggested revisions to the college dean, which were returned with revisions for final approval.

K-State submitted 44 degree programs for review representing the College of Agriculture, the College of Education, the College of Health and Human Sciences, and the College of Veterinary Medicine. Of the 44 degree programs reviewed, 18 are bachelor’s, 18 are master’s, and eight are doctorate. None of these programs were included in the Low Enrollment Program Report.

All 18 baccalaureate programs met or exceeded major and graduate minima and are recommended to continue. Those include the following: Agricultural Business; Agricultural Economics; Agricultural Communications and Journalism; Elementary Education; Secondary Education and Teaching; Agricultural Education; Human Ecology; Human Development and Family Science; Early Childhood Education; Apparel and Textiles; Kinesiology; Human Nutrition; Interior Design; Communication Sciences and Disorders; Athletic Training; Dietetics; Personal Financial Planning; and Hospitality Management.

Eighteen master’s programs were reviewed. Of those, 13 met or exceeded minima and are recommended to continue, including Agricultural Business; Agricultural Economics; Agricultural Education and Communication; Curriculum and Instruction; Educational Leadership; Special Education; Counseling and Student Development; Academic Advising; Adult Learning and Leadership; Master of Arts in Teaching; Dietetics; Family Studies and Human Services; and Public Health.

There were five master’s programs that did not meet one or both minima. The MS in Apparel and Textiles; MS in Gerontology; MS in Nutrition, Dietetics, and Sensory Sciences; MS in Hospitality Management, and the MS in Kinesiology. The programs in Gerontology and Kinesiology did not meet the minimum number of majors. The MS in Gerontology and the MS in Kinesiology are recommended for enhancement with review in another two years. The Gerontology program is part of a consortium of universities, the Great Plains – Interactive

Distance Education Alliance² (GP-IDEA), created to deliver high quality programs to member institutions who might not have the resources or local demand to house a program themselves. Further, the program will reduce the number of hours required from 36 to 33, and funding has been increased for new marketing efforts with more social media and display campaigns. The Kinesiology program is finalizing approval for a concurrent BS/MS program allowing students a path to two degrees in five years, and is seeking approval for concurrent BS in Public Health/MS in Kinesiology, as well. The faculty are developing a fully online delivery of the program to reach new markets and enhancing marketing to current BS students.

Though the MS in Nutrition, Dietetics, and Sensory Sciences does not yet meet the minimum five year average for numbers of students in the major, the most recent fall numbers show the major exceeding the minimum of 25. As such, it is recommended to continue.

The MS in Apparel and Textiles and the MS in Hospitality Management did not meet either minima. They are both recommended for enhancement with review after two years. The MS in Apparel and Textiles is also part of GP-IDEA. The program is developing a stronger online marketing effort, and is developing a concurrent BS/MS program that will allow students to earn both degrees in five years. The MS in Hospitality Management launched an online option in the last year, which has shown some improvements in admissions of students in its first year. The program has also applied to initiate a GP-IDEA program in Hospitality Management starting next year to reach more students. Faculty are also initiating a new concurrent BS/MS program that will allow students to earn both degrees in five years.

Eight doctoral programs were reviewed; all met minima and are recommended to continue. Those programs are in Agricultural Economics; Curriculum and Instruction; Educational Leadership; Special Education; Counseling and Student Development; Adult Learning and Leadership; Human Ecology; and Food, Nutrition, Dietetics, and Health.

K-State had previously identified five programs for additional review. The PhD in Genetics now greatly exceeds minima and is recommended to continue. While the MS in Genetics does not meet minima, it is a feeder program into the doctorate, and as such, is also recommended to continue. The Master’s in Horticulture and Natural Resources and the baccalaureate program in Philosophy now exceed the minima and are recommended to continue. Finally, the MA in Theatre, while not meeting minima, shows an increase in majors from the previous year, and is recommended for additional review.

Kansas State University
Status of Programs Needing Additional Review AY 2016-2019

Program	Year of Review	CIP	Degree Level	Recommendation
