Purpose of the Survey

The purpose of this project was to create a survey to collect data for use by Marion County Park and Lake. This data, with analysis, would provide information for the development of a lake management plan, which the Lake does not currently have. The primary objectives of the survey are to collect data on visitor and resident demographics, trip itinerary, and opinions on what the park and lake offer.

Lake Data

Coding

Code was used to develop our graphs and maps taken from spreadsheets created by lake superintendent Isaac Hett. Records were taken on paper and we have created a system to visualize the data in a digital format.

Home Location of All Paying Visitors

Where visitors are from

How long are visitors staying for and how much are they spending?
