6 Tips for Graduating with Money:

1

Start with a budget

Let us help prepare a budget for you each semester, much like an academic advisor and your class schedule.

2

Pay Yourself First

The more saving you do now, the more you will have to invest in the future.

3

Know the new credit card rules

Credit card requirements have changed. Keep up to date and informed.

4

If you do get a credit card...

Make timely payments and stay under 30% of your credit card limit to keep a good credit score.

5

Avoid payday loans

These often cause us to pay way too much in interest and annual fees.

6

Choose your job

Look at careers and potential income/benefits when choosing a job.

Students have enough to worry about between schoolwork, jobs, and a social life.

Let Powercat Financial Counseling help ease your concerns about financial issues!
