

# WANT TO EXPLORE Emerging Adulthood?

As a lab, we work to better understand development between 18 - 25 years of age by asking...

## WHAT

What changes occur during this time?

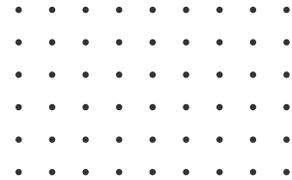

## HOW

How do those changes impact one's personality, psychological well-being, physical health, and more?

## WHICH

Which social factors support individuals during this time - specific to identity and background?

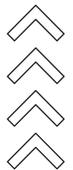

Be a part of research creation, data collection & analysis, write-up & possible presentation, and professional development.

Get course credit (Psych 599), grad school experience, & connected to others with similar interests

## NEED

3.0+ GPA  
6 hrs/week  
completed Psych 350  
interest, motivation,  
& organization
