WANT TO EXPLORE Emerging Adulthood?
As a lab, we work to better understand development between 18 - 25 years of age by asking...

<table>
<thead>
<tr>
<th>WHAT</th>
<th>HOW</th>
<th>WHICH</th>
</tr>
</thead>
<tbody>
<tr>
<td>What changes occur during this time?</td>
<td>How do those changes impact one's personality, psychological well-being, physical health, and more?</td>
<td>Which social factors support individuals during this time - specific to identity and background?</td>
</tr>
</tbody>
</table>

Be a part of research creation, data collection & analysis, write-up & possible presentation, and professional development.

**NEED**
- 3.0+ GPA
- 6 hrs/week
- completed Psych 350
- interest, motivation, & organization
