K-STATE ECOREPS AWARDS NOMINATIONS

The Office of Sustainability and the K-State EcoReps are now accepting nominations for the K-State EcoReps Awards. Three entities on campus will be awarded for their efforts in sustainability through significant impact, innovation, and community involvement. Any effort affiliated to the Kansas State University camps will be considered for the following awards.

*K-State EcoReps Impact Award*  
Seeking nominations for projects that have made a significant, measurable impact on sustainability on the K-State campus.  

*K-State EcoReps Innovation Award*  
Seeking nominations for projects demonstrating creativity and innovation in their pursuit of sustainable solutions at K-State.  

*K-State EcoReps Community Spirit Award*  
Seeking nominations for projects exhibiting teamwork, enthusiasm, and/or engage the campus community in their effort advocating sustainability on the K-State campus.

Nominations will be evaluated and awardees chosen by a selection committee of K-State EcoReps. Awardees will be recognized at a K-State Earth Day celebration ceremony from 11:30 a.m.-noon Thursday, April 24. Please submit the following nomination form by 5 p.m. Monday, March 3 to sustainability@k-state.edu.

---

**Nomination Form**

Name and describe the project.

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

Describe the leadership roles within the project. Who played these roles and how did they make the project come to life?

________________________________________________________________________
________________________________________________________________________
Demonstrate the project impact or potential impact on sustainability at K-State.
Provide data if possible/available to demonstrate the scale of impact (e.g. energy or money saved, number of people impacted, waste diverted from landfills or other).

Describe innovative/creative aspects of the project.

Describe teamwork and community engagement aspects of the project.

Additional information regarding the project must be attached in one page or less.
