Timothy J. Shaffer, PhD
Principles of Civic Discourse

- Seek understanding and common ground
- Expect and explore conflicting viewpoints
- Give everyone an opportunity to speak
- Listen respectfully and thoughtfully
- Offer and examine support for claims
- Appreciate communication differences
- Stay focused on issues
- Respect time limits

University of Arizona
What are the challenges you face as it relates to civil discourse within the classroom/workplace?
What would it take to cultivate an environment where we can engage differences constructively?
Making sense of civility in a democratic society
CIVILITY IN AMERICA 2018

PARTISAN AGREEMENT ON THE STATE OF CIVILITY IN AMERICA

Despite a steady barrage of partisan conflict, Americans from both political parties are generally united in the belief that uncivil behavior is rampant and having profound and negative effects on our democracy. The 8th installment of Civility in America by Weber Shandwick and Powell Tate conducted with KRC Research represents the opinions and experiences of 1,481 American adults who were surveyed in January 2018.

AMONG AMERICANS...

- **Ages 39–52**
  - GEN XERS: 61%
  - LIVED THROUGH: Gulf War, Oklahoma City bombing

- **Ages 18–38**
  - MILLENNIALS: 59%
  - LIVED THROUGH: September 11, High-profile mass shootings

© 2017 American Psychological Association
• Autocratization – the decline of democratic traits – accelerates in the world: for the first time since 2001, autocracies are in the majority: 92 countries – home to 54% of the global population. Almost 35% of the world’s population live in autocratizing nations – 2.6 billion people.

• EU has its first non-democracy as a member: Hungary is now classed as an electoral authoritarian regime.

• Major G20 nations and all regions of the world are part of the “third wave of autocratization”: autocratization is affecting Brazil, India, the United States of America, and Turkey, which are major economies with sizeable populations, exercising substantial global military, economic, and political influence. Latin America is back to a level last recorded in the early 1990s while Eastern Europe and Central Asia are at post-Soviet Union lows. India is on the verge of losing its status as a democracy due to the severely shrinking of space for the media, civil society, and the opposition under Prime Minister Modi’s government.

• Pro-democracy resistance grows from 27% in 2009 to 44% in 2019 amidst the autocratization surge. During 2019, citizens in 29 democracies mobilized against autocratization, such as in Bolivia, Poland, and Malawi. Citizens staged mass protests in 34 autocracies, among them Algeria, Hong Kong, and Sudan.

Young People and (Disinterest in) Liberal Democracy

“American citizens are not just dissatisfied with the performance of particular governments; they are increasingly critical of liberal democracy itself. Among young Americans polled in 2011, for example, a record high of 24 percent stated that democracy is a “bad” or “very bad” way of running the country—a sharp increase both from prior polls and compared to older respondents. Meanwhile, the proportion of Americans expressing approval for “army rule” has risen from 1 in 16 in 1995 to 1 in 6 in the most recent survey.”

Defining terminology
What do we mean by civility?

➤ Civility as politeness

➤ Provides us a code of conduct or “mode of behavioral management.”

➤ Focuses our attention on surface features of an action, rather than the motivation for the action or the nature of the action itself.

➤ About “manners” (the ways we do things).

➤ Politeness involves being polished: altering rough surfaces to make them smooth.

➤ Incivility is entirely a matter of being rude: of insulting others, either directly, or by using inappropriate tones of voice (OR ALL CAPS AND LOTS OF EXCLAMATION POINTS!!!).

➤ Civility as responsiveness

➤ The ideal of citizenship imposes a moral, not a legal, duty—the duty of civility—to be able to explain to one another on those fundamental questions how the principles and policies they advocate and vote for can be supported by the political values of public reason.

➤ This duty also involves a willingness to listen to others and a fair-mindedness in deciding when accommodations to their views should reasonably be made.

➤ If the slogan for civility as politeness is “we can disagree without being disagreeable,” then the slogan for civility as responsiveness might be “we can agree to disagree” or perhaps better, “disagreement is no reason to stop talking with one another.”

Civility as a Democratic Practice

- Strong civility
- Weak civility
- Pseudocivility
Civility as a Democratic Practice

- Strong civility
- Weak civility
- Pseudocivility

Figure 1.1 Pseudocivility in action
| DEBATE          | DE = ‘down’, ‘completely’  
|                 | BATRE = ‘to beat’  
|                 | DEBATE = ‘to fight’; ‘to resolve by beating down’  
| DISCUSSION      | DIS = ‘apart’  
|                 | QUATERE = ‘to shake’  
|                 | DISCUSSION = ‘to shake apart’; ‘to break apart’  
|                 | Same roots as ‘concussion’ and ‘percussion.’  
| CONVERSATION   | COM = ‘with’  
|                | VERTARE = ‘to turn’  
|                | CONVERSATIO = ‘turn about with’, ‘keep company with’, ‘act of living with’; ‘having dealings with others’; ‘manner of conducting oneself in the world.’

|                | LOGOS = ‘word’, ‘speech’, ‘meaning’, ‘reason’, ‘to gather together’  
|                | DIALOGUE = ‘flow of meaning’, ‘meaning flowing through’, ‘relationship’  
| DELIBERATION   | DE = ‘entirely’, ‘completely’  
|                | LIBRARE = ‘to balance, weigh’ (from libra: ‘scale’)  
|                | DELIBERARE = ‘weigh, consider well’  

Free Expression, Competing Views, and Open Inquiry
In 2017, Nancy Thomas, Director of the Institute for Democracy & Higher Education at Tufts University, wrote:

“Rancor over how U.S. colleges and universities manage free speech is not new, but it seems to have reached a feverish pitch since Donald Trump’s inauguration as the 45th President of the U.S. in January. Some stories, like those about Charles Murray at Middlebury and Ann Coulter at UC Berkeley, attracted incredible attention. Others were all but overlooked, and commentary on the highly reported cases seem singularly negative to institutions and students. Here’s a chronological recap, with some thoughts about what colleges and universities might do next....

It’s time to bring members of the campus community together to talk about institutional principles and practices, who benefits from and the costs of “absolutist” free speech, the meaning of “values-neutral” teaching, the practical protections of academic freedom, who decides whether, when, and under what conditions speakers come to campus, and how extreme partisanship in public life is affecting campus communities.

At the very least, colleges and universities should not leave these matters to people least affected by institutional policies and practices, such as the media, politicians, and regents. These are matters of institutional culture and campus climate for political learning and engagement for all students.”

Retrieved from https://compact.org/free-speech/
What We Know About Campus Climate Regarding Speech

1. Students say that (when politics come up in class) the majority of their UNC professors do try to discuss both sides of political issues and encourage opinions from across the political spectrum.

2. The current campus climate does not consistently promote free expression and constructive dialogue across the political spectrum.
   
   ➤ Some students even worry their course grades might be affected, and a substantial proportion of students—24.1% (liberal) to 67.9% (conservative) depending on student ideology—report engaging in self-censorship.
   
   ➤ A substantial proportion of students—over 25%—reported that they would endorse blocking or interrupting events featuring speakers with whom they disagree.

3. Although students across the political spectrum report facing challenges related to free expression, these challenges seem to be more acute for students who identify as conservative.

4. Students across the political spectrum want more opportunities to engage with those who think differently.

Self-Censorship as a Central Concern for Colleges and Universities

➤ The vast majority of students (87%) report feeling comfortable voicing their opinions and ideas.

➤ Very liberal students are 14 percentage points more likely to feel comfortable expressing their opinions in the classroom than their very conservative peers.

➤ Many (54%) admit to self-censoring, whether in the classroom and 29% of students have self-censored on campus outside of class because they thought their ideas might be politically incorrect.

➤ Conservative students are more likely to say that they have self-censored than liberal and moderate students.

Self-Censorship as a Central Concern for Colleges and Universities

- 87% of students feel comfortable sharing ideas and opinions in their college classrooms.
- 65% of students agree to having changed an attitude or opinion about an issue after listening to a guest speaker.

- The vast majority of students (87%) report feeling comfortable voicing their opinions and ideas.
- Very liberal students are 14 percentage points more likely to feel comfortable expressing their opinions in the classroom than their very conservative peers.
- Many admit to self-censoring, whether in the classroom (54%) and 29% of students have self-censored on campus outside of class because they thought their ideas might be politically incorrect.
- Conservative students are more likely to say that they have self-censored than liberal and moderate students.

- The Left’s dominance in higher education is most pronounced in the humanities and social sciences.
- The Left even dominates the “conservative” hard sciences.
- Even in supposedly Right-Wing fields like Political Science and Economics, Democrats vastly outnumber Republicans.

4. Students across the political spectrum want more opportunities to engage with those who think differently.

Conservative faculty appear to influence their students more than liberal professors do

Our study finds that some students feel political pressure from their professors, but few change their points of view.

By Alyssa N. Rockenbach, Matthew J. Mayhew, Kevin Singer and Laura S. Dahl

March 2, 2020 at 6:00 a.m. CST

This fall, the most polarized freshman class in half a century will begin its senior year of college in a highly contentious political year. Faculty members help shape the campus political environment. The Institute for Democracy and Higher Education has consistently found that high-quality political discussions in the classroom that promote an open and respectful exchange of ideas and consideration of dissenting or unpopular views are key to a healthy political environment.
The Growing Partisan Divide in Views of Higher Education

AUGUST 19, 2019

BY KIM PARKER

Increase in the share of Americans saying colleges have a negative effect on the U.S. is driven by Republicans’ changing views

% saying colleges and universities have a positive/negative effect on the way things are going in the country

Note: Share of respondents who didn’t offer an answer not shown.

PEW RESEARCH CENTER
“We first must dispense with the myth of the politically neutral classroom. All educational spaces are political. Even if instructors do not disclose their ideological stances, their beliefs can be found in the structure of their syllabi, the readings they assign, the students they call on during class discussions, and the nonverbal expressions they — often unknowingly — make. Intent here is immaterial; by merely engaging in the act of teaching, one is sending political messages to students.”
What is the contemporary role of professionals (and educators) creating space for civic learning?

How Do We Think about Education?
“To teach is to create a space.... A learning space has three major characteristics, three essential dimensions: openness, boundaries, and air of hospitality.”

–Parker Palmer
“The best ways of educating people is to give them an experience that embodies what you are trying to teach. When you believe in a democratic society, you provide a setting for education that is democratic.”

–Myles Horton
Cultivating Thoughtful Citizens Through Deliberative and Democratic Practices
What is Deliberative Pedagogy?

- Deliberative pedagogy is a democratic educational process and a way of thinking that encourages students to encounter and consider multiple perspectives, weigh trade-offs and tensions, and move toward action through informed judgment.

- It is simultaneously a way of teaching that is itself deliberative and a process for developing the skills, behaviors, and values that support deliberative practice.

- Perhaps most important, the work of deliberative pedagogy is about space-making: creating and holding space for authentic and productive dialogue, conversations that can ultimately be not only educational but also transformative.
This is a snapshot of the Engagement Streams Framework developed by Sandy Heierbacher and members of the National Coalition for Dialogue & Deliberation (NCDD) in 2005. The framework helps people decide which methods of dialogue and deliberation best fit their goals and resources.

For the full framework, go to [www.ncdd.org/streams](http://www.ncdd.org/streams).
Learn more by visiting deliberativepedagogy.org
Dialogue is a process of genuine interaction through which human beings listen to each other deeply enough to be changed by what they learn. Each makes a serious effort to take others’ concerns into her or his own picture, even when disagreement persists. No participant gives up her or his identity, but each recognizes enough of the other’s valid human claims that he or she will act differently toward the other.

Dialogue differs sharply from exchanging views, discussing, explaining, declaiming, debating or persuading. It contrasts to positional bargaining, to the adversarial proceedings in courtroom litigation and to the oppositional debate in a democratic parliament. In those approaches, solutions to problems are argued; the aim is to make the best argument possible. Many communities embroiled in such debate become engaged in “solution wars”—adversarial arguments over favored solutions.

Dialogue and deliberation stand in sharp contrast to these adversarial approaches. Some classic distinctions go like this:

In the words of David Bohm, a physicist and philosopher who turned his attention to the importance of dialogue in human relationships:

Contrast [dialogue] with the word “discussion,” which has the same root as “percussion” and “concussion.” It really means to break things up. It emphasizes the idea of analysis, where there may be many points of view, and where everybody is presenting a different one—analyzing and breaking up... Discussion is almost like a ping-pong game, where people are batting the ideas back and forth and the object of the game is to win or to get points for yourself.

In dialogue, on the other hand, one’s mind opens to absorb new views, enlarge perspectives, rethink assumptions and modify judgments. In debate, one listens to find flaws in others’ points so as to attack them and to defend one’s own point of view. In dialogue, one puts forward ideas while suspending judgment on them in the expectation that others’ thoughts will deepen them; together, two sides assume many approaches to an answer and work toward common ground. Debate assumes one right answer and invests only in pressing and defending it; dialogue assumes the possibility of an answer.
Civility in the workplace
Engaging as Colleagues

- **Articulate values and set expectations**
  - Be clear about your values and what it means to be part of that team/department/organization.

- **Define civility**
  - Strong, weak, pseudo; politeness and rules v. responsiveness

- **Give employees skills**
  - To teach employees these skills, you need to give explicit training that covers what civility looks like, describes situations in which employees sometimes act uncivilly, provides tips on how to maintain composure, and affords opportunities to practice behaving civilly in emotionally charged situations.

- **Coach employees for civility**
  - When coaching employees, focus on helping them learn to listen fully, give and receive feedback, work across differences, and deal with difficult people. You might also coach them on negotiation, stress management, crucial conversations, and mindfulness. Don’t just impart information.

One of the most crucial things for a department head, manager, or professor to do is to model the right behavior. You set the tone. Even if you establish expectations, define what civility means, give people training and coaching. Practice what you preach.

https://hbr.org/2018/01/make-civility-the-norm-on-your-team
QUESTIONS AND CONVERSATION
