

Ph.D. Graduate Research Assistantship Available

A Ph.D. Graduate Assistantship in the area of turfgrass science, with emphasis on landscape irrigation, is available in the Department of Horticulture and Natural Resources at Kansas State University in Manhattan, Kansas. Research will focus on exploring irrigation techniques that conserve water in turfgrass, including the utilization of soil moisture sensors and soil physical properties to inform irrigation decisions. The candidate should be interested in conducting research in field and laboratory settings, and in teaching and extension. To learn more, contact Dr. Dale Bremer, bremer@ksu.edu. For details about our graduate programs, visit <http://hnr.k-state.edu/graduate/>. For details about applying, visit <http://hnr.k-state.edu/graduate/admissions.html>.

Requirement:

B.S. or M.S. in Horticulture, Agronomy, or a related plant science field.

Preferred:

Background in turfgrass science, soil science, and/or landscape irrigation.
