

### **Turfgrass Intern By Sandia Golf Club, Albuquerque, New Mexico**

A Golf Course Management Intern will work closely with the Golf Course Superintendent and Assistant Superintendent in all aspects of golf course management.

- Course Setup
- Irrigation Repair
- Water management which focuses on hand watering green surfaces and surrounds (POGO)
- Fertilizer and Plant protectant applications
- Crew management
- Equipment Operation
- Tournament Preparation – New Mexico Open
- Small golf course improvement projects

The internship is geared to your abilities and what you specifically would like to learn and gain experience at Sandia Golf Club. There is an opportunity to grow with OB Sports/Troon in the future. I will be attending the GIS in Orlando if you would like to interview at that time.

It is preferred that Interns have at least one year of practical work experience working on a golf course. Interns should have a basic knowledge of golf course management and turfgrass management as a whole.

We are looking for a motivated individual(s) that possesses a strong work ethic, positive attitude, willingness to learn, and the desire to grow in the turf industry. Sandia Golf Club is an excellent opportunity to gain valuable experience maintaining a public course in a busy, high volume atmosphere. Voted the best golf course in Albuquerque that will host the 2020 New Mexico Open. Come enjoy all the beauty, weather, cultural aspects and recreation this region offers.

Check us out on Facebook.com/SandiaCasino or sandiagolf.com.
